Subject: Times Warner AOL

I am so tired of every other day another company is out to get Microsoft I use AOL but am about to quit everyone should work on there own companies and be succesfull instead of suing I am so shocked that a company like Times Warner would go so low, I guess anything to make money instead of working for it, This country should be proud of Microsoft and all the good work Bill Gates does. Try working hard like he does and maybe you will be a success instead of attacking anyone who has been a success
